

THE MANUFACTORY OF THE VERY FINEST WATCH WINDERS

INDIVIDUALITY

Your watch collection is an expression of your personality. Choose a watch winder that reflects your personal style and fits your lifestyle perfectly. Chronovision watch winders set no limits to your individuality. Flexibly adapt the features and materials of your favorite model to your own taste. Or you can have an exclusive unique specimen made to your specifications in our in-house manufactory.

PROTECTION

By choosing a Chronovision watch winder, you are choosing an object that will keep your personal valuables safe for generations. It protects your treasures of the time from dust and scratches - and if necessary, also from unwanted access. Every single detail of our watch winders is designed to preserve the value of your precious timepieces over time - from the safe storage and removal of the watches to the particularly gentle winding of the movement.

COMFORT

It simply feels good to open your Chronovision watch winder in the morning and spontaneously put on the watch that suits your mood. No winding, no tedious setting of time, date, moon phases, etc. Your favorite watch is always ready for action and optimally wound according to the needs of the respective movement. Making your watch collection an even greater pleasure.

PERFECTION

Our customers are just like us: Perfectionists. Our drive is to exceed even your very highest demands. That is why we develop and produce our watch winders ourselves - in our own manufactory in Halver in Germany. Over the years, we have designed a unique and globally unique product and have managed to acquire extensive manufacturing know-how. Our watch winders set standards - from the high quality of the materials to the intuitive control. Find your perfect Chronovision watch winder.

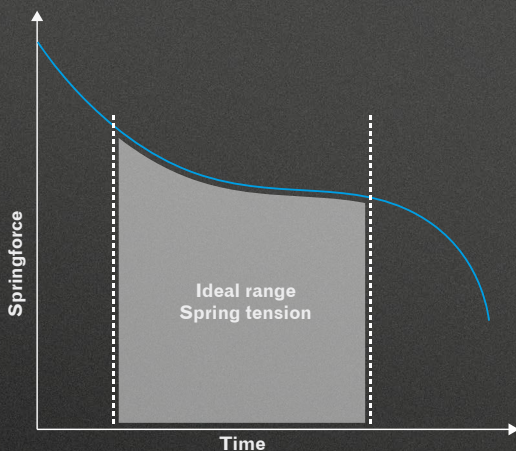

SOPHISTICATED FUNCTIONALITY
IN A PERFECT FORM

INNOVATION

INDIVIDUAL ROTATION SETTINGS

Chronovision watch winders wind each watch gently and precisely adapted to the movement, so that the spring tension is always in the ideal range. In order to make this possible, each individual module has its own independently controllable motor for the rotation. The rotation movement – right, left or both sides – can be set individually, as can the number of revolutions per day: This is set between 500 and 2,650 revolutions in steps of 50. The internal clock starts the program every full hour.

SYNCHRONIZATION

Technology and aesthetics harmonize in perfect unison in Chronovision watch winders. The patented „ChronoSync“ function ensures that several individual modules combine to form a single system and coordinate their rotations. Just like ballet dancers, the watches rotate absolutely synchronously. When a watch winder has reached the required number of revolutions, the rotor stops at the twelve o'clock position. This makes

the presentation of high-quality automatic watches a feast for the eyes – especially in conjunction with the 16-step controllable ambiance or interior lighting.

QUICK WIND AND INTELLIGENT SLEEPING PHASE

You have not moved one of your automatic watches for a long time? Then the fast winding mechanism quickly and gently applies the necessary tension to the tension spring. If you want complete silence at certain times, for example at night, activate the intelligent sleep phase: The already extremely quiet motors will then stop working for the period you have set.

The control remembers the missing rotations in order to make up for them automatically by extending the individual intervals in the active phase.

MODULARITY

Whether single or multiple winder: Each Chronovision watch winder consists of individually controllable modules that communicate intelligently with each other. This modular principle makes it possible, for example, to assemble a centrally controllable system from several single-movement Chronovision One series motors. On the other hand, it is guaranteed that even in a large design piece like the Grand Momentum, up to 64 watches can be moved individually and completely independently of each other.

POWER SUPPLY

Chronovision watch winders alternatively draw their energy from the power grid or from a battery. This allows you to wind your automatic watches in places where there is no power outlet nearby.

FASTENING

Often the small details reveal great quality. This applies particularly to the universal watch clasp of the Chronovision watch winders, on which women's and men's watches with large crowns and up to 60 mm in diameter can be positioned comfortably and securely. Stainless steel ball catches ensure a secure hold for the watch clasps. High-quality velour protects glass and other refined watch backs.

DESIGN

With their clear, unadorned and elegant design, Chronovision watch winders blend harmoniously into any stylish living environment. Whether with wood lacquer, piano lacquer or aluminium bezel, whether in high-gloss optics or matt: watch lovers have a wealth of high-quality materials and designs at their disposal to configure a fine watch winder according to their personal ideas.

We are also happy to manufacture individual pieces on request. Please contact us!

QUALITY MADE IN GERMANY

All Chronovision watch winders consist of high-quality components whose quality is continuously controlled. We assemble these in small series or as individual pieces in our own manufactory with great care and in accordance with the strict German standards. In order to guarantee the longevity of our modules, we test them with watches weighing 300 grams.

The driving force is provided by an extremely quiet motor that ran smoothly for more than 9,000 hours in the stress test with a watch – this corresponds to an operating time of around 16 years at 900 revolutions. Because we are convinced of the high quality and longevity of our watch winders, we grant an extended warranty of three years.

FOLLOW YOUR INTUITION

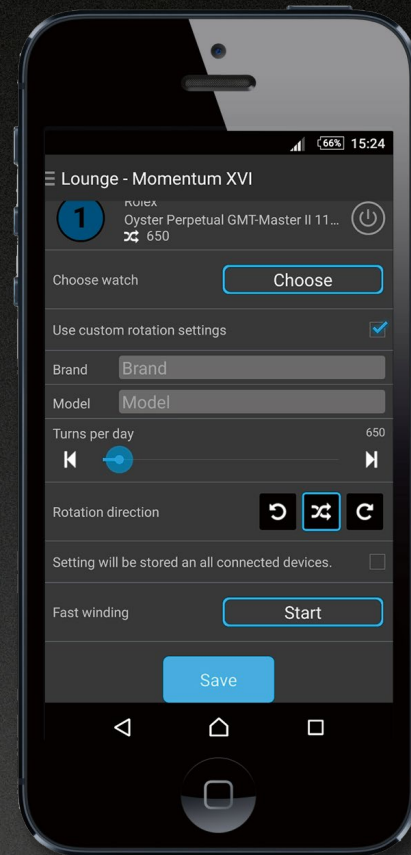

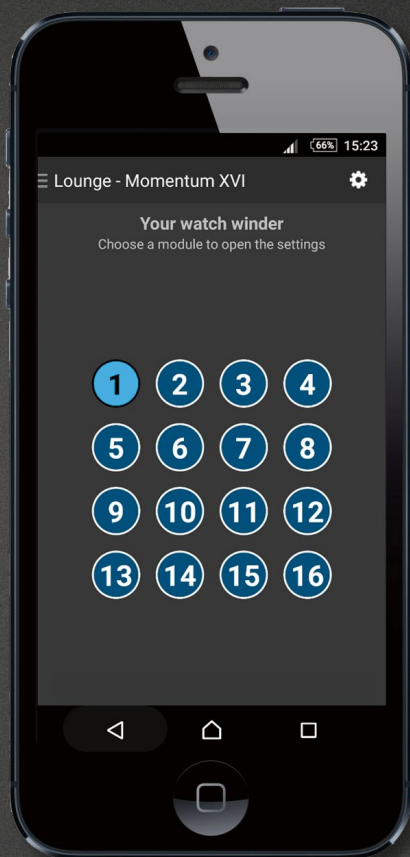

CHRONOVISION CONNECT APP

SOPHISTICATED CONTROL SYSTEM

The new version of the Chronovision Connect App for Android, iOS, PC and Mac takes the intuitive operation of watch winders to an all-new level.

After the app has connected to the desired Chronovision device via Bluetooth®, you can start and stop all or individual modules with a single touch. The matrix view enables the clear selection of the modules in multiple winders in order to program them.

Thanks to the comprehensive watch database, it is often sufficient to select the respective watch model in the module options in order to make the correct rotation settings. You can also enter the settings yourself quickly and easily. The fast winding mechanism for each individual watch can be triggered just as conveniently.

In the device options, you can adjust the interior lighting almost continuously, program the intelligent sleep phase and switch the button lighting on or off. The integrated memory ensures that program data such as direction of rotation and number of revolutions are constantly maintained. This way, you will have no worries even in the event of a power failure.

EMPIRE

Our „Monuments of Time“ are freestanding design objects and watch winders in one. Their elegant and modern appearance as well as their functionality, thought through down to the very last detail, are simply impressive.

The Empire series adds another aspect to this: discrete security. When closed, the object appears as a decorative pedestal that does not hint at its inner values. Only by touching the invisible buttons embedded in the wood does the body gently extend upwards and reveal its watch winder technology for 16 watches.

The multi-stage, dimmable LED interior lighting ensures that your watches always come into their own. Of course the lighting is adjustable with the app. finishes and refined functionality.

ChronoVidual

The series Empire offers the following options for customization (Details page 86):

The secret compartment under the lid offers you the possibility to store smaller valuables such as keys, writing instruments, other watches or jewelry.

A mirror with a fine polished accent is embedded in the inside of the lid. Chronovision Empire sets special accents in your home with its versatile and high-quality finishes and refined functionality.

MOMENTUM

The watch winders of the Momentum series are impressively large, functional pieces designed for ambitious collectors. As monuments of time, they form the glittering focal point of exclusive rooms.

Their linear design in noble finishes, the charm of the generous glass surfaces and the clarity of the line are the expression of a wonderfully rigorous, handcrafted structure. Your valuables are hidden from view thanks to the privacy glazing.

Only when the LED lighting illuminates the interior does the precious collection of 16 or 32 clocks – depending on the design – become visible. The security of the watches behind the privacy glass is guaranteed by a high-quality finger scanner from the security technology that controls the lock system.

SOOTHINGLY SAFE **EXCITINGLY BEAUTIFUL**

GUARDIANS OF TIME

Our guardians of time preserve what is of lasting value to you. Jewelry that is precious not only because of its precious material and artistic design, but also because of the special memories associated with it.

Treasures whose fascination is everlasting and whose sight we enjoy on special occasions. It's a good feeling to know that these treasures are safe. Shielded from the hustle and bustle of everyday life.

Stored for unique moments of happiness – in a place that bears your individual signature.

A feeling that makes you sleep well at night. And that in the morning - when you open the safe with a touch of your finger to put on a watch or a piece of jewelry - it involuntarily brings a smile to your face.

ALL POSSIBILITIES
NO COMPROMISES

DESIGN SAFES FOR THE MOST DISCERNING OF DEMANDS

Uncompromising safety combined with noble, purist and individual design. With their robust yet stylish body, reliable locking mechanism and variable and esthetically pleasing interior, our watch safes are the ideal storage place for the most valuable automatic watches and other personal treasures.

INDIVIDUALITY WITH SYSTEM

The size, finish, coloring and security class of the safes are determined entirely by the needs of their future owners. The modular safe concept enables our customers to create individual safes quickly and easily - even without any special previous knowledge in the field of security technology.

The layout of the interior can be chosen as individually as the material of the interior lining. LEDs illuminate the interior automatically when the doors are opened. The wide range of pre-defined colors and finishes makes it easy for you to match the design of your safes to your home environment and aesthetic preferences.

If you have a design idea of your own, we will be happy to take up your suggestion. Since each Chronovision watch safe is handmade in our manufactory, there are no limits regarding individualization.

THE INTERIOR

THE MODULAR TREASURE TROVE

The modular interior of our design safes can be individually adapted to your wishes. It combines a variable number of watch winders to fit exactly and, if desired, with drawers or a showcase module.

The design of the interior can be individually selected in terms of color and material. You can choose between types of various genuine leather and high-quality velvet suede.

These precious materials are harmoniously combined with the attractive design and well thought-out details such as the tray, which serves as a convenient storage space for watches and jewelry.

So that your treasures always appear in the best light, LEDs automatically illuminate the interior of the safe optimally when the doors are opened and can also be controlled using the Chronovision App.

LOCK

A high-gloss chrome finger scan lock provides convenient access to your personal treasure trove. In addition to a master fingerprint (administrator),

up to 99 other fingerprints can be registered. Alternatively, the safes are available with a digital combination lock or a mechanical double-bit lock.

Both the fingers scan lock and the digital combination lock have a mechanical revision so that the safe can also be opened with a key if required.

COMFORTABLE OPENING AND CLOSING VIA FINGER SCAN

You don't have to remember a code to be on the safe side.

CERTIFIED SECURITY

All Guardians of Time are EN-1143-1 certified. The resistance class of our safes can be adjusted up to Class 4 depending on the model.

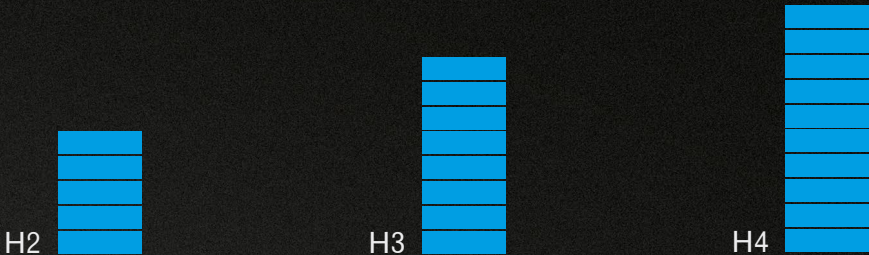

These classes are used by insurance undertakings as a guideline for determining the insurable extent.

VDS-CLASSES

- VDS I < 65.000 €
- VDS II < 100.000 €
- VDS III < 200.000 €
- VDS IV < 400.000 €

WILD NATURE

WELCOME TO THE PREMIER
CLASS OF SAFES.

A PIECE OF REAL WILDERNESS IN
THE COMFORT OF YOUR HOME.

WILD NATURE

The sidewalls of Chronovision Wild Nature are made of solid Douglas fir with a material thickness between 50 and 80 mm.

As no two trees are alike, each Chronovision Wild Nature is unique. In the center there is a flow-like pattern of epoxy resin with color particles in green or blue. The black high-gloss lacquered safe body creates an exciting contrast to the wood.

The Douglas fir veneered interior of the safe door bridges the gap to the exterior design. The rest of the interior is lined with high-quality velvet velour in anthracite.

On the top side of the safe there is a solid glass pane that can be used as a shelf.

WILD NATURE RESIN BLUE

Size H3

- » INTERIOR: LEATHER, VELOUR

MAJESTY

Chronovision Majesty captivates at first glance with its fine wood finish. A wooden coat covered with high-quality veneers encloses the entire body with the exception of the front, which is finished with several layers of lacquer.

The veneer is picked up on the inside of the door. The rest of the interior and the center section of the drawer is lined with fine velvet velour or leather.

OSIRIS

Reliable guardian of your treasures and design object in one:

The pronounced tailored multi-part genuine leather upholstery gives the Chronovision Osiris a special allure.

Depending on the color selection of the main and accent leather, you can adapt its appearance to your individual taste: from classic-elegant to sporty-modern.

The elegantly finished interior elegantly continues the outer contours with a finely circumferential decorative seam on the inner safe door.

CHRONOM
VISION

DAYTONA

It was no coincidence that the Daytona from Chronovision was inspired by a legendary race track: The design of this safe is simply breathtaking. Construction with safety and security The safe is sanded, primed, lacquered in several layers and polished for finish in an elaborate process. The interior is lined with high-quality leather or fine velvet velour.

The outer sides of the three-part drawer front pick up the body color, while the center layer adopts the interior material. Another highlight is the elaborate, racing inspired diamond embroidery on the inside of the door.

FASCINATING UNIQUE PIECES

INDIVIDUALLY CRAFTED ACCORDING TO YOUR SPECIFICATIONS

BESPOKEN OF TIME

For all those who want to define their own appearance, we offer the Bespoken of Time series. Bespoke means: We will build exactly the watch winder you want in consultation with you – independent of all material and shape specifications.

An individual sideboard, a solid wood safe, a wardrobe with integrated design safe – everything is possible.

For us, the passion for watch winders is inseparably linked with the enthusiasm for producing furniture.

Our modern carpenter's workshop has special know-how in the field of veneer and solid wood processing.

Due to the regional cooperation with specialized companies from the metal and natural stone processing, we are able to fulfill almost every wish of our customers.

This includes the integration of our Chronovision watch winder modules into existing furniture.

We look forward to your challenge!

BESPOKE MARBLEWALL

48 Chronovision watch winders included in a solid marble panel.

INTERIEURS OF TIME

You already have a precious piece of furniture and would like the perfect integration of a high-quality watch winder into your existing space? Our Interieurs of Time series produces the appropriate fitting for you.

You tell us the interior dimensions available (width, height, depth, diagonal) as well as the desired number of watch winder modules. You will then receive a quote and technical drawing from us for approval.

SOPHISTICATED FUNCTIONALITY IN A PERFECT FORM

CHRONOVIDUAL

Collectors of Time, Monuments of Time and Guardians of Time are exclusive design furniture, which we have brought to series maturity in a careful development process lasting several months.

But the final appearance of these exclusive watch winders and design safes is up to you.

Approximately one hundred different versions are available. Configure the model of your choice using the material and color options presented here.

The Chronovidual Box shows which parts of the model could be individually altered.

Colours in the original may differ slightly from the printed colours in this catalogue.

For a real haptic impression and true colours we recommend our Chronovidual sample folder with the original veneers, lacquers, leather samples and yarns.
